

Drum Drier

Application:

- ▶ Calcite
- ▶ Dolomite
- ▶ Quartz
- ▶ Feldspar
- ▶ Refractory materials
- ▶ Metallic minerals and ores
- ▶ Clay

Performance:

- ▶ Feedsizes up to 50 mm
- ▶ Capacity 5 to 30 t/h
- ▶ Water evaporation up to 3.000 kg/h

Features:

- ▶ Most common drying method in the mineral industry
- ▶ Rotating drying drum with hot air flow
- ▶ Product transport and revolution forced by internal vanes
- ▶ Drying drum available in various design, depending on diameter:
 - one-way design
 - two-way design
 - three-way design
- ▶ Heating by oil or gas
