

Hammer Mill

Application:

- ▶ Mineral fillers
- ▶ Ceramic fillers
- ▶ Construction material
- ▶ Chemical products
- ▶ Other soft to hard minerals

Performance:

- ▶ Capacity 1 to 50 t/h
- ▶ Water evaporation 100 to 3.000 kg/h
- ▶ Feedsizes 0 to 100 mm
- ▶ Final size smaller 4 to 10 mm

Features:

- ▶ Hammer mill in robust construction
- ▶ Rotor with swinging hammers made from wear resistant steel
- ▶ Grid in solid construction, made from wear resistant steel
- ▶ Long service life
- ▶ Housing easy to open for cleaning and maintenance
- ▶ Bigger mill types are equipped with a hydraulic unit for the opening mechanism
- ▶ Hot air operation up to 500 °C enables grinding and drying in one step
